## THE PROGRAM

The Summer 2008 Kenya Study Abroad Program will focus on environment, development, culture and history of Africa with emphasis on Kenya. Visits to cultural and historical sites will include colonial settlements in Kimuru, Karen Blixen Museum, Bomas of Kenya, Railway Museum, Village Market, Nairobi National Museum, Orogessaile Archaeological Site in the Rift Valley, Fort Jesus, Gede Ruins Archaeological Site, Ngomongo Villages and many more. Visits to plant and wildlife rich areas will include overnight stays in Mount Kenya (the second largest mountain in Africa), Lake Nakuru National Park (home of the flamingoes), the world renowned Maasai Mara that adjoins the Serengeti of Tanzania, and Amboseli National Park.

Lectures will be provided by invited guest speakers, Kenyatta University faculty, a WPU faculty, local specialists on the ecology and history of selected communities. Additionally, Kenyan guides trained in history and ecology of particular sites will be invited to share their knowledge and experiences with the students.

Following one week of intensive classroom instruction, there will be a **two week field study/safari**. The field study is a follow up of classroom instruction which will give students an opportunity to witness first hand what they have learned in the classroom. In various hotels where we will stay overnight, there are special programs including slide shows of local ecology, entertainment by African dancers, talks about the history and culture of local groups and many more. These programs usually follow dinner and are very educational.
