

Aerotek Jobs out of Parsippany, NJ

Top Three Skills:	Monitor, Environmental, Biologist
Job Description:	Monitor Threatened & Endangered species, specifically birds, from land and/or boats (piloted by licensed captain), in the area of contractors who are engaged in Post-Superstorm Sandy debris clean up and sediment dredging in NJ, for compliance with state and federal permit conditions and established protocols. Provide Regional Managers with daily reports summarizing the activities of contractors, problems encountered, and corrective actions taken, as well as projected data needs.
Work Environment:	The successful candidate should be prepared to work long days, including weekends, in a variety of outdoor environments, and inclement weather; 10 hour days/6 days a week
Qualifications:	Bachelor's degree in applicable field (wildlife biology, environmental biology, or related biological science discipline) Technical proficiency at aerial photo and thematic map interpretation, and the use of GPS, compasses and rangefinders.
Performance Expectations:	Ability to identify the species of raptors and shorebirds that are typical to the coastal areas, marshes, and bays of New Jersey (e.g., osprey, bald eagle, red knot, etc.)
Interview Information:	Interview face to face with Assistant Branch Manager and possibly with Natural Resource Services Department Manager
Additional Compensation:	Per Diem is available depending on where the individuals will be living
Additional Information:	The area of interest is the entire coast of New Jersey Client would like someone with 10 years experience, but would consider an individual with less experience if specifically relevant to the study areas; A recent grad would also be acceptable, but must demonstrate direct and relevant experience. Ultimately, we will need to present resumes to the NJDEP
