At the current time there is a Nationwide Shortage of Tuberculin Skin Test Antigen Solutions for testing. However this does not exempt you from providing proper documentation for clinical clearance. If your provider is unable to test you, following are possible alternatives; or you may check with the Health Department in your community or county.

**Options to get PPD**

**Wayne Health Department- $5 per test** (they get it from the state and recently received a shipment)

- Must call for an appointment- 973-694-1800 x-3373 or x-3374
- Open Mon-Fri only
- 473 Valley Road, Wayne NJ

http://www.waynetownship.com/health-clinics.htm

or

**CVS Minute Clinic- $39 per test** (do not accept insurance)

**Walgreens Healthcare Clinic- $28 per test** (possible insurance coverage)

http://www.walgreens.com/topic/pharmacy/healthcare-clinic.jsp

The best way to find out if CVS and Walgreens have PPD in stock is to go in person.
