MORE BREATHING ROOM FOR STUDYING LIFE SCIENCES AT WILLIAM PATERSON

Graduate student Roy Feliciano of Palisades Park works in William Paterson University's Science Enrichment Center bee lab during yesterday's grand opening for the expanded and renovated 232,000-square-foot Science Complex, which includes Science Hall East and Science Hall West. At left, students work in the renovated complex, which offers research and classroom laboratories for biology, chemistry, environmental science and physics. There is also a greenhouse, mathematics learning center, animal research facility, psychology clinical training suite and microscopy suite, among other features.
