

Syllabus Statement on Student Recording in the Classroom

The use of any recording device during class sessions (including lecture, lab, studio, recitation, etc.) requires prior written permission from the instructor(s). Written permission by one instructor in a team-taught course does not permit recording in class sessions taught by other instructors. Permitted recordings are for personal educational use only, and may not be duplicated for any reason, posted to any web-site, or sold. Non-permitted recording or use of such recordings will be treated as a violation in accordance with the Student Code of Conduct section III.k.
