There are several factors used to determine how much CASH you can get back for used textbooks,including:

*Condition: Any book being sold back must be in good shape, with binding, covers and every page intact.

Excessive highlighting, underlining or other markings may decrease a book's buyback value.

*Course Materials Orders: If an instructor has requested your textbook for next term, then the value increases.

Books falling into this category may be worth anywhere from 30% to 70%, of the original purchase price.

Generally speaking, textbooks will be purchased until we reach our shelf stock limit.

*Overstocks and Current Editions Not Being Used on Campus: If we have reached our limit on a particular

title for next term, or if your book has not been requested for next term and is a current edition, we may still

purchase it. The CASH back you will receive is based on various criteria including the national demand and

the needs of other bookstores.

*Prices are subject to change
