

HELP SAVE THE MONARCH BUTTERFLY

Come hear about the endangered Monarch Butterfly while working to form a garden that is being created to save them. The WPU Climate Action Committee is creating a beautiful butterfly garden up by the Water Tower where there is a fenced-in sunny area. Bring old clothes, a rake and a shovel while we get ready for plantings of butterfly plants and milkweed. We need help with water resources, woodchips and some expert garden advice. Please call Claire Chomiak at ext. 2672 if you are interested. There will be various times to chose from to work.
