INCORPORATING INTERACTIVE TOOLS TO BB

- Incorporate digital tools such as FlipGrid (https://info.flipgrid.com/), VoiceThread (https://voicethread.com/), Padlet (https://padlet.com/), etc.

- During synchronous online sessions, use interactive real-time activities by using easy to use tools such as Padlet, Google apps, Polleverywhere (https://www.polleverywhere.com/), Kahoot! (https://kahoot.com/) etc.

- Give creative assignments, such as compiling web/video resources relating to a given course topic, constructing a video project like a commercial, public service announcement, or mini research presentation—keep it short and you will likely witness incredible levels of student engagement.

- Keep some virtual office hours on Blackboard Collaborate Ultra. Just go to the Course Room and wait during the designated time.

- Create hyperdocs: it will be easy for students to follow what needs to be done each week: https://hyperdocs.co/
