**Course Objectives for Principals of Microeconomics:**

1. Students will become familiar with the basic concepts in economics, including opportunity cost, supply and demand, elasticity, and productivity.
2. Students will learn the major determinants of price and quantity in a wide range of markets, including perfectly competitive, monopolistically competitive, oligopolies, and monopolies.
3. Students will learn how to analyze the behavior of firms within their market structure.
4. Students will develop skills to analyze impacts of policy actions (such as environmental regulation, antitrust actions, deregulation) and to evaluate the advantages and disadvantages of different policies.

**Student Learning Outcomes:**

Students will be able to:

1. Effectively express general economic concepts in written/oral form.
2. Demonstrate ability to think critically.
3. Locate and use information related to economics.
4. Demonstrate ability to integrate knowledge and ideas in a coherent and meaningful manner.

During the course students will learn how to:

1. Relate economic concepts to other real world events.
2. Have a broader perspective.
3. Read and explain the content of economic materials from a secondary source (such as the Wall Street Journal, New York Times, etc.)
4. Critically evaluate the impacts of economic policies at the micro level.
5. Explain basic economic principles.
