Pre-College Programs for High School Students
July 8–August 2
Middle School Programs and Summer Life on Campus
July 1–August 9
Pre-College Programs for High School Students

William Paterson University’s 2013 Summer Pre-College Programs will foster a successful transition to college for high school students. They will have the opportunity to experience college life, learn new skills, and obtain the information necessary for their next destination—college! Stay in our residence halls or commute.

Art

Web Page Design
An introduction to the planning, design and construction of web pages. Students will learn the basics of how the Internet works and the principles of web design, by designing and building a website of their own. Students will gain a solid foundation in html, file management, and how to use Adobe Dreamweaver and other graphics software to create web pages.
July 8-12 • 9:00 a.m. – 4:00 p.m. • $485 for commuters; $799 for residents (technology fee included)

Digital Photography
This workshop will introduce participants to the essentials of the medium. Participants will be required to provide their own digital camera, which has at least 5.0 mega pixel rating. Students will expand both their technical and artistic skills, allowing them to employ the creative method to develop a more visually stimulating body of work.
July 15-19 • 9:00 a.m. – 4:00 p.m. • $485 for commuters; $799 for residents (technology fee included)

Drawing and Painting with Portfolio Review
Draw and paint with us in this weeklong workshop, a “must” for anyone passionate about art! You will also discover useful skills in the creation and presentation of an art portfolio.
July 8-12 • 9:00 a.m. – 4:00 p.m. • $485 for commuters; $799 for residents (technology fee included)

2D Animation: Adobe Flash
Adobe Flash is the leading software used to create 2 dimensional animations for film, video and the Internet. This course introduces the principles of animation and the basics of the Adobe Flash software. Students will design and create a short, character-driven animation of their own, including sound effects and interactive buttons.
July 22-26 • 9:00 a.m. – 4:00 p.m. • $485 for commuters; $799 for residents (technology fee included)

Computer Painting & Digital Art
This course explores the computer as a visual art-making tool. Using state-of-the-art computer paint software, students will learn digital drawing and painting techniques to simulate natural media on the computer, and investigate the image-making possibilities unique to electronic media. Emphasis will be placed on understanding issues common to all computer graphics.
July 22-26 • 9:00 a.m. – 4:00 p.m. • $485 for commuters; $799 for residents (technology fee included)

Business

Wealth and Management Camp
Become immersed in the financial world as you sit on a real trading floor with live feeds with information from global stock markets and up-to-the-minute news. Learn how to invest and manage your personal finances as you engage in hands-on exercises lead by prominent business community members and University faculty and staff.
July 8-12 • 9:00 a.m. – 4:00 p.m. • $675 for commuters; $990 for residents (technology fee included)

Fundamentals of Effective Business Practice: An Introduction to the Principles of Management
This workshop has been designed to target a high school audience eager to learn about the current trends and challenges managers face in this fast-paced and recovering economy. Structured in a seminar style, including guest lectures, presentations, and business case studies, students will participate in numerous lectures and discussions ranging from topics such as: the art of managing a successful business practice, management theory as an essential background for the exceptional manager, the manager’s changing work environment, ethical responsibilities, etc.
July 15-19 2013 • 9:00 a.m. – 4:00 p.m. • $485 for commuters; $799 for residents (technology fee included)

Art History: Survey with an Emphasis in Writing
This will be an art history survey class. Emphasis will be placed in relating different works of art to historic events and contexts. The class will serve students in strengthening their knowledge of history, art, and their analytical capacity. Students will also hone their writing skills in preparation for college-level writing.
July 22-26 • 9:00 a.m. – 4:00 p.m. • $485 for commuters; $799 for residents (technology fee included)

Drawing Anatomy
This class will explore the human anatomy through drawing in different media. Bone and muscle structure will be explored through the use of anatomical software presentations and guided drawings as well as direct observation. Emphasis will be placed on understanding the function of bones and muscles in human motion. The students will build a compelling portfolio of anatomic drawings.
July 15-19 • 9:00 a.m. – 4:00 p.m. • $485 for commuters; $799 for residents (technology fee included)
Exploring Entrepreneurship, Sales Skills for Today and the Future

Students in this program will learn what it’s like running their own business, how to negotiate, write a business plan, and work in teams to create a world-class business. In addition, students will experience a series of life-changing, thought-provoking, and highly interactive skill development exercises. The I.D.E.A. (Instruction, Demonstration, Experience, and Assessment) process that has been adopted will enable students to maximize their development by utilizing proven sales techniques to have an immediate impact to influence others. Students will be recorded and provided with team and facilitator feedback in our College of Business Russ Berrie Institute Lab based on the techniques they studied in class. Students will be able to take home a DVD of their sales engagements to assist them in advancing their current skill levels. We encourage students who register for this course to also register for all our business courses in order to maximize learning.

July 29-August 2 • 9:00 a.m. – 4:00 p.m. • $485 for commuters (technology fee included)

College Readiness

Academic Writing for College with College Survival Skills

(Please refer to course description under English and Languages)

July 8-12 • 9:00 a.m. – 4:00 p.m. • $485 for commuters; $799 for residents (technology fee included)

SAT Verbal

Get ready for the SAT’s writing and critical reading portion as you strengthen your test-taking skills by increasing your vocabulary and writing skills to receive a score that reflects your ability. Other tools to be covered include time management, scoring strategy, anxiety relief, and tricks to get into the SAT mindset, along with a discussion about the ACT. Leave with the tools and confidence to take your score to the next level.

July 15-19 • 9:00 a.m. – 4:00 p.m. • $485 for commuters; $799 for residents (technology fee included)

Communication

The Art of Cinema

This course will provide students with the necessary tools for film appreciation, film critique, film history, and film study. The development of critical interpretation and descriptions of popular culture is included.

July 8-12 • 9:00 a.m. – 4:00 p.m. • $485 for commuters; $799 for residents (technology fee included)

SAT Math

Preparing for the SAT is always recommended and encouraged. Learn the ins-and-outs of the test’s math portion as you strengthen your test-taking skills to receive a score that reflects your ability. Other successful tools will include time management, scoring strategy, anxiety relief, and tricks to get into the SAT mindset, along with a discussion about the ACT. Leave with the tools and confidence to take your score to the next level.

July 15-26 • 1:00 p.m. – 4:00 p.m. • $425 for commuters; $749 for residents

Gear-up for College

Are you curious about life on a real university campus? This program is the perfect opportunity to get a head start on your future college life. Experience a residence hall for a week as you learn college survival tips, like good study habits, and build lasting friendships. Open to students becoming juniors, seniors, and college freshmen in September 2013.

July 15-19 • 9:00 a.m. – 4:00 p.m. • $485 for commuters; $799 for residents (technology fee included)

Script Writing for Stage and Screen

This course is writing-intensive and is designed to introduce the fundamentals of developing and writing scripts for film, television, and the live stage. The course emphasizes theme, story, plot, dialogue, character arc, dramatic structure, script format, and the process of developing and writing a script. We will analyze films and read screenplays.

July 15-19 • 9:00 a.m. – 4:00 p.m. • $485 for commuters; $799 for residents (technology fee included)

Radio Disc Jockey (DJ) and Broadcasting

This course will immerse students in the fundamentals of being a radio DJ and broadcaster. From planning a radio show, to producing programming content and selecting music, this course will train students how to record, edit and broadcast their creative radio ideas. The class will train in the award-winning WPSC 88.7 FM radio station, named as the Best College Radio Station in the Nation at the 2012 IBS Awards. The class will culminate with students broadcasting live on WPSC and to the world via the online webstream.

July 22-26 • 9:00 a.m. – 4:00 p.m. • $485 for commuters; $799 for residents (technology fee included)

Acting and Auditioning

Discover your unique talents and develop self-confidence and good communication skills to be used in any future career. A live mini-performance will showcase your creativity and talent!

July 29-Aug 2 • 9:00 a.m. – 4:00 p.m. • $485 for commuters (technology fee included)

Education

Summer Urban Teacher’s Academy

The Academy’s goal is to attract students to the field of education through exposure to curriculum and practicum experiences that focus on teaching. Working in small groups, students will formulate mini-lessons and/or activities for elementary/middle school children. Other benefits include the opportunity to meet William Paterson faculty; meaningful, creative, hands-on, learning activities; learning how to impact students’ lives; team-building exercises; and experiencing the William Paterson campus.

Residents: July 8-11 • AND July 15-18

Commuters: July 8-11 • AND July 15-18

• Free for commuters; $350/week for residents

(must submit application, call for more details)

Academic Writing for College with College Survival Skills

Writing academic papers is one of the most important skills you need to master in college. The sooner you develop these skills the greater your chance for academic success. The primary goal of this course is to prepare high school students currently enrolled in AP level humanities courses for the challenges they will face in a college writing course.

Along with learning what tools you will need to prepare yourself for the college writing experience, you’ll discover important college survival skills including: time management, emotional intelligence, critical thinking skills, learning styles, being engaged in learning by listening, taking notes, and participating in class.

July 8-12 • 9:00 a.m. – 4:00 p.m. • $485 for commuters; $799 for residents (technology fee included)

English and Languages

July 8-12 • 9:00 a.m. – 4:00 p.m. • $485 for commuters; $799 for residents (technology fee included)
World Literature
This class will explore literature from around the world through analysis, class discussion, and writing assignments. Students will read, analyze, and research a variety of diverse literary texts in the context of their culture and history. In this class, students will learn basic literary terms, concepts, and critical strategies while learning to appreciate the conventions of a variety of genres.
July 15-19 • 9:00 a.m. – 4:00 p.m. • $485 for commuters; $799 for residents (technology fee included)

Summer Writing Institute: Journalism and Fiction
Aspiring writers who are considering a future as professional journalists, poets, novelists, or public relations specialists are invited to this week-long, intensive institute. The program will introduce emerging writers to diverse forms and styles, including essays, poetry, fiction, reporting, and screenwriting.
July 22-26 • 9:00 a.m. – 4:00 p.m. • $485 for commuters; $799 for residents (technology fee included)

Novel Writing
Begin the journey to becoming a published novelist by tackling the writing process and turning your story idea into a fully developed novel. Learn basic components to grab your readers, which include developing a catchy title, as well as a strong opening line.
July 29-August 2 • 9:00 a.m. – 4:00 p.m. • $485 for commuters (technology fee included)

Humanities and Social Science
Politics and War
This course emphasizes the complexity, variability, and cultural persistence of war as it occurs around the world. It is our expectation that students will call into question the purpose of war from all perspectives, including the government, populace, media, and parties engaged in conflict.
July 8-12 • 9:00 a.m. – 4:00 p.m. • $485 for commuters; $799 for residents (technology fee included)

Global Social Problems: Society, Equality, and Human Rights
This course examines contemporary social problems and modes of conflict resolution from historical, philosophical, sociological, and anthropological perspectives. In an attempt to resolve many human rights issues, students are introduced to a variety of human social experiences through the lenses of race, gender, sexuality, income, and other forms of social stratification; to examine the results of these environmental and social conditions on behavior and reality; and to examine how societal context impacts social deviance, poverty, crime, and educational and healthcare inequalities. The course will draw on the traditional methods of inquiry used by scholars in the liberal studies profession.
July 15-19 2013 • 9:00 a.m. – 4:00 p.m. • $485 for commuters; $799 for residents (technology fee included)

Leadership in Action: Knowing Self and Making a Difference
This course examines from individual, interpersonal, and group points of view the types of leadership that is required to be successful in high school, college, and beyond. Students will be encouraged to assess their own leadership style and to develop a leadership action plan. The course will also cover the importance of leadership roles, leadership qualities, ways to make a positive difference in the community. The course provides opportunities to work on individual and group projects that will assist students with their college exploration process. Throughout the week, students will work on a leadership portfolio, which will include their action plan, goals, and vision statement.
July 15-19 • 9:00 a.m. – 4:00 p.m. • $485 for commuters; $799 for residents (technology fee included)

Pre-Law: Anatomy of a Case
For anyone interested in pursuing a career in law, learn the necessary ingredients to a successful prosecution or defense. In addition, this workshop is designed to provide students with the foundational legal knowledge and critical thinking skills necessary for success in law school.
July 15-19 • 9:00 a.m. – 4:00 p.m. • $485 for commuters; $799 for residents (technology fee included)

Anthropology and Exploration of Cultures
The goal is to help students understand the human condition through the multi-lensed science of anthropology. By looking at and discussing various contemporary issues, and through a discussion of the concepts of cultural evolution, major belief systems, and conceptions of what it means to BE human, we believe that students will understand and appreciate the diversity of the human experience.
July 22-26 • 9:00 a.m. – 4:00 p.m. • $485 for commuters; $799 for residents (technology fee included)

Race, Gender, and Social Justice
This course analyzes multiple forms of social oppression and inequality based on race (and color), sex (and gender), sexual orientation (and identity), and social status in the United States. It will examine social oppression and the ways that systems of social oppression affect us individually, legally, culturally, institutionally and globally.
July 29-Aug 2 • 9:00 a.m. – 4:00 p.m. • $485 for commuters (technology fee included)

Music
Guitar in Classical, Jazz and Rock
Designed to provide students with an intensive and fast-paced experience, this program exposes them to new concepts and skills in preparing to perform on the guitar. They will receive private lessons and master classes, and participate in daily ensemble rehearsals and classes in technique, guitar history, performance development, and other related topics.
July 15-19 • 9:00 a.m. – 4:00 p.m. • $485 for commuters; $799 for residents

20th Annual Jazz Workshop
This special workshop, open to both commuters and on-campus residents, is seven intense days of improvisation and performance for students fourteen and older. It offers ten exciting small jazz ensembles, and classes in improvisation, arranging, and history, and features world-renowned artists in nightly clinics and concerts—including an evening at a legendary New York City jazz club.
July 21-27 • 9:00 a.m. – 9:00 p.m. • $764 for commuters; $1090 for residents

The William Paterson Summer Audio Recording Camp
Learn about the art and practice of recording from industry professionals. Participants will have hands-on experience in a professional recording studio and take part in recording and mixing sessions. Students will also learn about running a recording session, microphone techniques, improving room
acoustics, developing critical listening skills, tips on using DAW software and computer interface, signal processing, how to polish a mix, and careers in audio.

Rock Band Experience
Get ready to rock! Become involved in all aspects of being in a band, from writing songs and practicing to performing and learning about the music business. Gain a better understanding of what it is like to be in a band and the dedication, practice, and hard work it takes.

July 22-26 • 9:00 a.m. – 4:00 p.m. • $485 for commuters; $799 for residents

Science
A Mountaintop View of Geology
Dive into the world of environmental science! Learn about the topography of neighboring High Mountain and how huge boulders made it their home, then test the water quality of nearby streams. Find out how important soil really is. This program is available to students becoming sophomores, juniors, and seniors in September 2013.

July 8-12 • 9:00 a.m. – 4:00 p.m. • $575 for commuters; $890 for residents (lab fee and materials included)

Anatomy and Physiology
Analyze microscopic characteristics and properties of the human body, examine cheek cells under a microscope, learn the principles of osmosis, and measure the performance of your heart with an EKG system.

July 8-12 • 9:00 a.m. – 4:00 p.m. • $575 for commuters; $890 for residents (lab fee and materials included)

Aquatic, Plant, and Microbial Ecology
Learn about the physical, chemical, and biological aspects of our local streams as you explore our backyard and travel to High Mountain to collect organisms to study and identify. This is a great opportunity for students who love to spend time outdoors and use their hands while challenging their brains. Experience first-hand how to prepare results in a scientific manner, as well as how to use a lab.

July 15-19 • 9:00 a.m. – 4:00 p.m. • $575 for commuters; $890 for residents (lab fee and materials included)

Computer Game Design and Programming
This is a fun-filled summer camp in which high school students can explore the basics of game design and game programming. Activities include: • Basics of game design and choices to make • Setting up story lines • Deciding the game type • Tools and the game engine • Designing backgrounds, levels, and characters • Programming motions, actions, events, traps, timing and triggers • Adding sound and the testing/debugging of games. Students should have had some exposure to programming, preferable in Java, C++, or script language.

July 8-12 • 9:00 a.m. – 4:00 p.m. • $575 for commuters; $890 for residents (technology fee included)

Using Microcontrollers: The First Step of Robotic Systems
Have you ever wondered how technology is interfaced to the real world or how a robot can sense the environment and move about? Embedded microcontrollers are the underlying devices that drive the technology behind today’s automobiles, robots, and cell phones. Learn the fundamentals of microcontrollers, which range from elementary programming to the basic electronics necessary that allow microcontrollers to perform simple tasks. Each student will work individually with the “BASIC Stamp” microcontroller module and obtain hands-on experience with electronics components and Basic programming.

July 8-12 • 9:00 a.m. – 4:00 p.m. • $575 for commuters; $890 for residents (lab fee and materials included)

Current Trends in Physics Part I
Students can develop high-level skills as they explore physics by using fun experiments and demos such as an air rocket lab and a roller coaster project. This workshop offers a unique educational experience geared both to students’ high abilities and to the need for peers who share their academic abilities and their love of learning.

July 15-19 • 9:00 a.m. – 4:00 p.m. • $575 for commuters; $890 for residents (lab fee and materials included)

Future Nurses
This workshop provides a great opportunity to get an inside view of nursing and learn up-to-date procedures. Students are introduced to real-life nursing as they experience patient contact with RN supervision, as well as training for professional RN supervision, including the use of a defibrillator. It also includes a field trip to a medical facility.

July 15-19 • 8:00 a.m. – 4:00 p.m. • $575 for commuters; $890 for residents (lab fee and materials included)

Computer Security: Principles and Practice
This course introduces the general principles of computer and network security from an applied standpoint. Topics include network fundamentals and the internet, basic security concepts, operating system security features, and legal and ethical issues related to security. Students will also become familiar with security tips and acquire good security practices that would help prevent home computers and networks – wired or wireless – from being victimized. The course requires neither advanced math nor programming experience.

July 15-19 • 9:00 a.m. – 4:00 p.m. • $575 for commuters; $890 for residents (lab fee and materials included)

Current Trends in Physics Part II
This is a continuation of Physics Part I which will allow students to further explore the world of physics using engaging experiments, projects, and demonstrations such as momentum and collisions which is associated with building an egg shuttle project, introduction to different electric circuit elements and series and parallel connection which is associated with building a house and powering the house with electric circuits, magnetism exploration and building a simple electric motor from two magnets, light and optics with lenses experiments, and much more.

July 22-26 • 9:00 a.m. – 4:00 p.m. • $575 for commuters; $890 for residents (lab fee and materials included)
Computer Forensics and Cyber Crime

This course introduces the basic elements, concepts, tools, and common tasks of computer forensics. It covers the process of identifying, collecting, analyzing, and presenting the evidence in court. Topics include email, web, data, document, mobile, and network forensics as well as legal aspects of computer forensics. Technical foundation of the course such as basics of hardware, operating systems, computer networking, and security are also introduced. Wherever applicable, case studies and lab demos will be provided.

July 22-26 • 9:00 a.m. – 4:00 p.m. • $575 for commuters; $890 for residents (lab fee and materials included)

Experiencing Sport Management Areas

This course provides students with an overview of sport management. This course also helps them understand how to prepare and develop their career opportunities before, during, and after college in the sport management areas. For practical experiences, this course will include sport facility tour(s), marketing plan development, movie analyses, and resume development for their future goals.

July 22-26 • 9:00 a.m. – 4:00 p.m. • $485 for commuters; $799 residents

Genetic Engineering, CSI, and Bioethics

In recent years, science and ethics have become major considerations for the general populace. They are both necessary, but must work together. Students will explore and discuss some of the most challenging and controversial topics facing our world today, such as stem cell research, animal rights, and research on humans.

July 22-26 • 9:00 a.m. – 4:00 p.m. • $575 for commuters; $890 for residents (lab fee and materials included)

Enrichment Programs for Middle School Students

With over fifteen exciting programs to choose from, you become immersed in a unique university experience from July 1 to August 9, 2013.

Programs Offered July 1 – 5, 2013

An Inventor’s Workshop

Students will identify problems and opportunities for new or improved products such as kitchen utensils, sports equipment, games and tools. They will brainstorm possible solutions, come up with the best solution, and build working models. Along the way they will build a Spaghetti-Marshmallow tower to engender team-building and to stimulate their creative juices. We introduce electromagnetic principles through the construction of simple motors using a battery, a magnet, a nail and a wire. The students will bring in and take apart old machines, printers, computers, instruments, toys, etc. to teach them the safe use of tools, help them understand how products are made and assembled, and give them parts for new inventions. Kits of motors, batteries, wheels, etc. will also be supplied for students to build to their own design.

July 1-5 • 9:00 a.m. – 4:00 p.m. • $225

Fashion Design Sewing

Learn about the principles of fashion design, color theory, and fabric science as you design, sketch, and create an outfit. Students will receive their own notebook, as well as a 15” fashion doll to learn how to drape fabric. The workshop will end in a fashion show as students model their creations to friends and family! All levels of sewing experience are welcome.

July 2-5 • 9:00 a.m. – 4:00 p.m. • $299

(Materials Included)

Programs Offered July 8 – 12, 2013

Drawing

Students in this workshop will explore drawing in different techniques, such as pencil, charcoal, ink and collage on paper. At the end of the week-long workshop students will have produced one finished piece in different media.

July 8-12 • 9:00 a.m. – 12:00 p.m. • $225

(Participants receive drawing kit)

Programs Offered July 15 – 19, 2013

Start the Music: A Creative Musical Experience for Young Musicians

(Note: Students must be entering Grade 6-8 in September 2013)

Start the Music is a one-week program that guides young musicians on a path to creative self-expression and savvy musical engagement. Students fine-tune their ability to listen to pitch through East Indian engagement. Students fine-tune their ability to listen to pitch through East Indian

Start the Music is a one-week program that guides young musicians on a path to creative self-expression and savvy musical engagement. Students fine-tune their ability to listen to pitch through East Indian
take a class on Social Media and are assigned the task of promoting and producing their own concert performance, which is scheduled to take place the last day of the program. Unlike most music camps that only focus on technique, Start the Music covers technique as a means to a creative end. Our students compose, improvise, and promote their music through the web. Start the Music is a true 21st century musical experience. July 15-19 • 9:00 a.m. – 4:00 p.m. • $399

“Gee, I’m a Tree” (Geometry)
Participants will be provided with a study of the mathematical fundamentals necessary for quantitative thinking and skills for the applicability of mathematics in different fields. All these objectives will be achieved while exploring nature and the various mathematical components of everyday life. July 15-19 • 9:00 a.m. – 12:00 p.m. • $225

Programs Offered July 29 – August 2, 2013

C++
Learn the basics of how to create a computer program using Microsoft Visual Studio C++. Take a hands-on approach to create basic utilities (like a calculator) and simple games like “guess the number,” “tic-tac-toe,” and more. Best of all, you get to keep your games! July 29-August 2 • 9:00 a.m. – 12:00 p.m. • $225

Digital Movie Making
Develop a story concept; engage in the storyboarding process; then create, organize, edit its elements, and publish it to the web as you share it at a culminating student film festival. July 29-August 2 • 9:00 a.m. – 12:00 p.m. • $225

Rock Band Experience
Get ready to rock! Become involved in all aspects of being in a band, from writing songs and practicing to performing and learning about the music business. Gain a better understanding of what it takes to be in a band and the dedication, practice, and hard work that it takes, as well. July 29-Aug 2 • 9:00 a.m. – 4:00 p.m. • $575

Short Stories — Creative Writing Camp
As your ideas flow, put them down on paper. Learn how to make others hear and see as your characters do. Make them smell and taste a meal, as well as feel a fine napkin. Bring a writing notebook and pencil or pen as you discover how to make words as realistic as film! July 29-August 2 • 1:00 p.m. – 4:00 p.m. • $225

Programs Offered August 5 – 9, 2013

Acting and Auditioning
Discover your unique talents and develop self-confidence and good communication skills to be used in any future career. A live mini-performance will showcase your creativity and talent! August 5-9 • 1:00 p.m. – 4:00 p.m. • $225

Cartooning Fundamentals and Techniques
Ever dream of creating your own comic book? Start here to make your own mini-comic book by using the same techniques as the pros. Topics will include story structure, character design, background design, inking techniques, color concepts, individual styles, editing, and lettering. All levels of drawing are welcome and creativity is encouraged. August 5-9 • 9:00 a.m. – 12:00 p.m. • $225

CSI Forensics
Discover the criminal justice system by participating in team building and role playing exercises. Explore forensics used in crime solving by analyzing physical evidence such as handwriting, fingerprint, and blood splatter patterns. August 5-9 • 9:00 a.m. – 12:00 p.m. • $225

Game Design
The workshop is designed to provide the beginning skills to developing games. We will cover aspects including planning, managing files, images, strategies, navigation, programming and more. The student will use these concepts and skills, combined with their artistic vision to create at least two sample games. The instructors will be given access to resources to help them succeed including Internet links, materials, plans, guidelines and access to professionals who can answer questions. August 5-9 • 9:00 a.m. – 12:00 p.m. • $225

Global Social Problems
This course examines contemporary social problems and modes of conflict resolution. In an attempt to resolve many human rights issues, students are introduced to a variety of human social experiences. August 5-9 • 9:00 a.m. – 12:00 p.m. • $225

Web Design
The workshop is designed to provide the beginning skills to designing a website. We will cover aspects including planning, managing files, images, color schemes, navigation and more. The student will use these concepts and skills, combined with their artistic vision to create a working web site. The instructors will be given access to resources to help them succeed including internet links, materials, plans, guidelines and access to professionals who can answer questions. August 5-9 • 1:00 p.m. – 4:00 p.m. • $225

Additional Programs: check our website for updates.

Robotics
Put your robot to the test with maze races, “battlebot” tournaments, and other exciting challenges. Design, assemble, and program robots that will be able to communicate, move, and think! July 2013 • 9:00 a.m. – 12:00 p.m. • $279

Reading Programs for Elementary and Middle School Students
William Paterson University’s Pre-College Youth Programs is in the process of developing a reading program for students entering elementary and middle school in September 2013. Please visit our website at www.wpunj.edu/cpe for details or call Iris Di Maio at 973-720-2998.

Early registration discount of 10% for registrations completed prior to June 1, 2013
Summer Life on Campus
Enjoy Your Next Summer Getaway in a Supportive College Environment at a Six-Week, All-day Camp

July 1 – August 9 • 8:00 a.m. – 6:00 p.m.

Enjoy a unique summer day camp on the William Paterson campus. Summer Life on Campus is open for students entering grades 6 to 9 in September 2013. A typical week includes well supervised enrichment and academic workshops, indoor and outdoor activities using the University facilities, a weekly field trip and fun galore! This is an ideal program for working parents who prefer their child in a safe, well-managed environment where both academic and recreational activities are offered. The program is scheduled to run Monday to Friday, 8:00 a.m.-6:00 p.m., beginning July 1st and ending August 9th.

Lunch, camp T-shirt and class materials are included!

Cancellation Policy
- Notification must be received in writing at least five business days prior to the course to receive a full refund minus a $15 processing fee.
- If we receive less than five business days notice, you will receive a credit towards another youth program during the current summer session less a $15 processing fee.
- NO refunds or credits will be given after the first day of the camp/program.

Please send all youth program cancellation notifications to: youthprograms@wpunj.edu

“Focusing on middle school students is taking William Paterson in the right direction! Steering kids down a path which inspires them and offers intriguing new concepts related to their interests and age levels, will foster positive ideals in a child.”

—Cathy C.
