Dear William Paterson University Community,

As the new dean of the Cheng Library, it is with great pleasure and the fulfilling contentment of the librarian at the sight of a bibliography produced by the institution he serves, that I present you Cheng Library’s 27th annual University Authors Bibliography. As in years past, this bibliography showcases the scholarly output of William Paterson University faculty, the experts charged with the development of our young minds for the professional and disciplinary challenges of today and tomorrow. 38 books, almost 70 book chapters, 247 articles and more is no small accomplishment. It is testament to a dedication and intellectual vibrancy that should make every academic community proud. Our authors have with such productivity honored the long held and treasured practice that those who facilitate the acquisition and growth of knowledge be themselves active participants in its creation and dissemination.

Higher education has always been the forum for the creation, transmission, and acquisition of knowledge and ideas, and at the center of that process stands the elders of the knowledge sphere and the novices to be groomed. From the elders comes wisdom to be shared and knowledge to facilitate discovery. By the works displayed in this bibliography the faculty of this University have shown that they are among the finest of that breed. To all the authors, as a librarian and lover of knowledge artifacts I am touched by your performance, as a colleague I salute you, and as an admirer I congratulate you. Thank you for doing what you have done, and I know you will continue to be fruitful and a source of pride for William Paterson University. Thanks to the University for supporting your efforts and celebrating your achievements.

Sincerely,

Edward Owusu-Ansah, Ph.D.
Dean of Library Services
