WP Faculty/Student Ratio in 2010: 16.3 Fall 2020: 13.3 (Source: IPEDS)										
Notes:	Data via total enrollments (i.e., all student course seats in a department).									
	Orange departments are 2020 merged departments. Data was aggregated for 2010, so a 2010 vs. 2020 comparison could be made.									
	Description of analysis: This was a straight forward calculation. Using the base year when WP									
	had its highest historical enrollments, a ratio of total enrollments per faculty member #'s at that time was made.									
	From there, a calculation was made on what faculty size would match that ratio (column G).									
	Column H is the difference between that number and the actual 2020 FT Faculty number.									
	Number in column H <u>does not</u> include faculty who have already indicated intent to retire by the end of the 2020-21 contract.
