Program

Conference Program - Session Descriptions, Schedule at a Glance

Building on last year's successful conference, What Works: Getting to Know Our Students' Stories, our 2022 What Works theme is: Repurposing, Rethinking and Reaffirming Equity and Access. What works in terms of promoting student equity and access? How can we repurpose, rethink and reaffirm our commitments to equity and our strategies for ensuring access for all of our students?

What are the goals of this conference? This is an opportunity to gather to learn about evidence-based practices used here at WP, or elsewhere, that benefit students. What outcomes are we striving for and how do we measure equity and access? How can we contribute to student success at the university by supporting their well-being? What works for communicating with students, promoting their well-being, teaching and learning, and assessing whether we have accomplished our goals?
